

Miriam Acuña | Full-Stack Developer

Bogota, Colombia • miriacode.vercel.app • linkedin.com/in/miriam-acuna-enciso • github.com/miriacode

SUMMARY

Mid-Level Full-Stack Developer with ~4 years building B2B e-commerce platforms across LATAM. I translate business requirements into reliable, maintainable systems. Curious by nature, I learn by going deep into the fundamentals, own features end-to-end, and communicate closely with clients and team. Well-equipped with AI tools like Claude Code, integrated into my daily workflow to ship faster without sacrificing code quality. Bilingual (English C2, ECPE-certified).

EXPERIENCE

Mid-Level Full-Stack Developer

Lima, Peru

Riqra - B2B e-commerce platform for manufacturers and distributors across LATAM.

Sept 2022 - Present

- **Owned major cross-functional projects** from kickoff to production, driving technical design, implementation and rollout across multiple system layers. Such as quotations checkout (line items, coupons, invoicing), bulk ordering, and couriers and branches management.
- **Ran client discovery sessions** with distributors and manufacturers to surface real business needs, translating them into technical specs and implementation plans the team could execute on.
- **Built a portfolios management system** backed by a granular permissions layer from scratch, now serving 400+ distributors across the platform.
- **Led the customer & distributor vertical of the multi-vendor architecture migration** – built the migration foundation (data migration scripts, distributor resolution refactor), the distributor REST API surface (CRUD, features, coverage, document types), and the full back-office UX.
- **Integrated three ERPs end-to-end** (KameERP, ControlERP, Shopify): order and quotation sync, retry logic for failed payload groups, and GraphQL-based product/variant/price sync.

EDUCATION

Full-Stack Web Development

Coding Dojo Bootcamp

Lima, Peru

2022

Intensive full-stack web development bootcamp focused on the MERN stack (MongoDB, Express, React, Node.js), agile workflows and collaborative full-stack projects

Bachelor of Economics

National University of San Marcos

Lima, Peru

2021
